SECTION II - USER DATA

Variable	**Description**	
id	User identification number	7
originalId	Original ID	8
ExpCondition	Experimental condition	9
date	Date of data collection	10
time	Time of data collection (GMT)	11
attempts	Number of entries from the same computer	12
mobile	User accessed VAA with mobile device	13
referer	Website that referred user to the VAA	15
ip	Encrypted ip	17
device	Type of device used to access the VAA	22
os	Operating system used to access the VAA	24
browser	Browser used to access the VAA	27
inviterId	Inviter id (for SNA)	28
barChart	User satisfaction - Bar Chart	29
polMap	User satisfaction - 2-D political Map	30
svr	User satisfaction - Social Vote Recommendation	31
radar	User satisfaction - Radar Chart	32
suppTimer1	Time taken to respond to the first group of supplementary questions	33
suppTimer2	Time taken to respond to the second group of supplementary questions	34
suppTimer3	Time taken to respond to the third group of supplementary questions	35
sex	User sex	36
age	User age in years	38
education	User educational level	39
province	User province	40
interestInPolitics	User Interest in politics	41
voteIntention	User vote intention for the upcoming legislative election of March, 15th, 2017	42
voteReason	The main reason user will vote for their party of choice	43

prevVote	User previous vote in the 2012 general elections	44
forecastVote_m18to35noUni	Forecast vote for men, 18-35, with no university education	45
forecastVote_m18to35Uni	Forecast vote for men, 18-35, with university education	46
forecastVote_f18to35noUni	Forecast vote for women, 18-35, with no university education	47
forecastVote_f18to35noUni	Forecast vote for women, 18-35, with university education	48
forecastVote_m36to50noUni	Forecast vote for men, 36-50, with no university education	49
forecastVote_m36to50Uni	Forecast vote for men, 36-50, with university education	50
forecastVote_f36to50noUni	Forecast vote for women, 36-50, with no university education	51
forecastVote_f36to50noUni	Forecast vote for women, 36-50, with university education	52
forecastVote_m51to65noUni	Forecast vote for men, 51-65, with no university education	53
forecastVote_m51to65Uni	Forecast vote for men, 51-65, with university education	54
forecastVote_f51to65noUni	Forecast vote for women, 51-65, with no university education	55
forecastVote_f51to65noUni	Forecast vote for women, 51-65, with university education	56
forecastVote_mOver65noUni	Forecast vote for men, 65+, with no university education	57
forecastVote_mOver65Uni	Forecast vote for men, 65+, with university education	58
forecastVote_fOver65noUni	Forecast vote for women, 65+, with no university education	59
forecastVote_fOver65Uni	Forecast vote for women, 65+, with university education	60
usefulResult	User assessment of most useful results screen	61
placeTimer1	Time taken to respond to the user placement of self and parties on the Left-Right axis	62
placeTimer2	Time taken to respond to the user placement of self and parties on the Progressive-Conservative axis	63
placeTimer3	Time taken to respond to the user placement on party leader evaluations screen	64
placeTimer4	Time taken to respond to the Probability To Vote screen	65
LRplace_Self	User placement of Self on the Left-Right axis	66

q5	Mortgage relief	100
q6	Anonymous application	101
q7	Entrepreneurs without personnel	102
q8	Choice for end of life	103
q9	Islam	104
q10	Softdrugs	105
q11	EU Membership	106
q12	EU Expansion	107
q13	Immigration	108
q14	Refugees	109
q15	Environmental measures	110
q16	Energy-saving measures	111
q17	Coal plants	112
q18	Student loan system	113
q19	Binding referendum	114
q20	Defense	115
q21	Welfare	116
q22	Own risk in healthcare	117
q23	Free market in healthcare	118
q24	Mileage tax	119
q25	Multicultural society	120
t1	Response time for question 1 (sec)	121
t2	Response time for question 2 (sec)	122
t3	Response time for question 3 (sec)	123
t4	Response time for question 4 (sec)	124
t5	Response time for question 5 (sec)	125
t6	Response time for question 6 (sec)	126
t7	Response time for question 7 (sec)	127
t8	Response time for question 8 (sec)	128
t9	Response time for question 9 (sec)	129
t10	Response time for question 10 (sec)	130
t11	Response time for question 11 (sec)	131
t12	Response time for question 12 (sec)	132
t13	Response time for question 13 (sec)	133
t14	Response time for question 14 (sec)	134
t15	Response time for question 15 (sec)	135
t16	Response time for question 16 (sec)	136
t17	Response time for question 17 (sec)	137
t18	Response time for question 18 (sec)	138
t19	Response time for question 19 (sec)	139
t20	Response time for question 20 (sec)	140
t21	Response time for question 21 (sec)	141
t22	Response time for question 22 (sec)	142
t23	Response time for question 23 (sec)	143
t24	Response time for question 24 (sec)	144
t25	Response time for question 25 (sec)	145
totalTime	Total time taken to complete q1 to q25	146

SECTION III - PARTY DATA

SECTION I - STUDY DESCRIPTION

General Description

The user data in the accompanying file were collected through the Voting Advice Application (VAA) *Stem-Consult*, which was launched two weeks before the elections for the House of Representatives (Tweede Kamer) in the Netherlands on the 15th of March, 2017. Cedroni (2010) and Garzia and Marschall (2014) provide good introductions to the logic of VAA buildings and data gathering, while Gemenis (2014) provides a thorough description of the party positioning method used to generate the party positions.

The VAA contained in itself an experiment in which the wording of several of the main and additional items were altered. Users were randomly assigned to one of the two conditions at the start of the VAA. The variable indicating this assignment is **ExpCondition**. Where there is different wording in the items, this is indicated in both this codebook and the datafile.

User Data

Andreadis (2014)

The codebook for the user data includes the variable descriptions both in English and Dutch as well as frequencies for the data.

Party Data

The party data refer to the positions of the Dutch political parties that were used in *Stem-Consult*. These positions were estimated using the *Delphi*-method as described by (Gemenis 2014; Gemenis and van Ham 2014).
